

Innovative Practices at school-

Experiential Learning Corners –

- Math Lab – Children learn math through games and puzzle. Playing cards, tangrams, Abacus promotes curiosity and self learning.
- Science Lab – School has Science lab where students learn the concepts encourage students to observe, explore and analyze results. This builds curiosity and logical thinking.
- ICT Lab – School has Information and Communication Technology lab equipped with computers, internet connectivity, digital tools and audio visual resources. Each student get an access to computers that helps learn computer skills such as typing, coding graphic design, multimedia creation etc.
- In Pre-Primary classes focus is on experiential learning where the children learn the concepts by doing activities themselves.

Project based Learning – Student work on real world problems such as waste management/ water conservation, student research, brainstorm involves teamwork. Puppetry and Theatre arts are used as a medium to develop communication skills, social skills, linguistic skills and confidence. The school follows the best practices of energy conservation through Rain Water Harvesting, sensor taps, sensor urinals and sensor lights.

Outdoor and Nature Learning - Student explores nature objects which create strong real life connections. The school is a Trash Free and Plastic Free campus for last 10 years. This is a Student driven project.

· Mindfulness and well being sessions are organized twice a week that includes yoga and PT.

· For positive motivation and good discipline among students, they are exposed to the world of Indian Classical music and dance from an early age.

· Compulsory First Aid training is given to all teaching staff, drivers, bus attendants and support staff.

- Compulsory Fire Fighting training is given to all teaching staff, drivers, bus attendants and support staff.
